Company Financing
Contract Makes Pos-
itive Assurance

A new "cross state highway," designated as road No. 25 by the state highway department, extending between

West Palm Beach and Fort Myers by way of the south end of Lake Okechobee, will be ready for travel about October 1 and completely finished January 1, according to Captain F. Deane Duff, chief engineering official representing The Clewiston Company, which has the contract for the 17 miles of the road from Belle Glade to the Hendry county line.

Captain Duff's statement was issued

the latter part of last week through the news service department of the Clewiston Chamber of Commerce, which is maintained by the interests that are developing the Clewiston townsite and the adjacent Sugarland drainage district.

The Chamber of Commerce article is printed in full in another column of this paper.

The Clewiston Company took the contract for the section of the road from Belle Glade to the Hendry county line in the name of its then general manager, Mr. Smith. It bid an amount equal to the county engineer's estimate, no other contractor having bid as low. If the road costs more than the amount

contracted. The Clewiston Company will pay the difference as a bonus or subsidy to get the highway completed at an earlier date than if it had been necessary to readvertise and thus delay

At the Sebring Farms, an avocado development east of Miami canal a distance of less than a mile, the editor of The Everglades News on Monday saw one of Otis A. Hardin's floating dredges, an American Steel dipper machine, throwing up material for the road grade. It was working east. Another one of the Hardin dredges was at the other end of the forest between Se-

At the Sebring Farms, an avocado development east of Miami canal a distance of less than a mile, the editor of The Everglades News on Monday saw one of Otis A. Hardin's floating dredges, an American Steel dipper machine, throwing up material for the road grade. It was working east. Another one of the Hardin dredges was at a point on the lake front between Sebring Farms and South Bay. The smoke from one of the Bryan & Holloway dredges was also to be seen from the boat on the lake on which the writer was riding.

Starting at the Hendry county line and going east, there is a grade for the special road and bridge district No. 11 road, this grade extending to and past the community of Bare Beach. The grade was made by a dredge operated by Bryan & Holloway for Palm Beach drainage and highway district, the road

Starting at the Hendry county line and going east, there is a grade for the special road and bridge district No. 11 road, this grade extending to and past the community of Bare Beach. The grade was made by a dredge operated by Bryan & Holloway for Palm Beach drainage and highway district, the road district and the drainage district splitting the expense because the canal dug to get material for the road grade also serves as a drainage canal. This piece of work connects with the work that the Hardin dredge is doing.

District and the drainage district splitting the expense because the canal dug to get material for the road grade also serves as a drainage canal. This piece of work connects with the work that the Hardin dredge is doing.

Personal inspection of what the contractors have accomplished supports the claim of the contractors and The Cleviston Company that the 17 miles of road from Belle Glade to Hendry county line will be ready for travel about October 1 and completely finished by the first

Personal inspection of what the contractors have accomplished supports the claim of the contractors and The Clewiston Company that the 17 miles of road from Belle Glade to Hendry county line will be ready for travel about October 1 and completely finished by the first week in January of 1927.

Right of way is cleared and bridges are in and as the machines that are making the grade are of the floating type, no amount of rainfall should hamper the schedule, as the experience has

CHARLES W. BELL

To the People of the Everglades District of Palm Beach County

In your interests, some of you have persuaded me to become a candidate for re-election, although my private interests prompted my retirement at the end of this term. I believe that the completion of our present program of roads for this district is more important to our mutual interests in this county than any other single factor.

WE ARE ALL LAND-OWNERS TOGETHER

We are all interested in these roads now under construction and what their completion will mean to our common interests and community life. The Everglades District should have as good roads as can be built. This will mean Progress and Prosperity for the entire county. And to get them, I see that it is important for the present program to go on without interruption.

IT IS UNWISE TO CHANGE HORSES IN MIDSTREAM

Thus, having been able to forward our common cause this far, I wish to see our program through to a winning finish.

OUR RECORD

YOU VOTED \$990,000 OF ROAD BONDS
WE RECEIVED FOR THIS ISSUE \$1,030,000
THIS MEANS WE SECURED YOU A PREMIUM OF
\$40,000 OVER WHAT YOU AGREED TO APPROPRI-
ATE.

I personally had meetings with bond-holders and stayed "on the job" tirelessly until we were able to sell these bonds for this sum. Every project included in this bond issue is now under way. My purpose in "carrying on" is to see that this MILLION THIRTY THOUSAND is properly spent and paid out only as contracts read.

I have been on the job at all times.
I want to stay on the job until it is finished.

Believing it for the common interest of all concerned, I ask your support on June 8th.

CHARLES W. BELL,

COUNTY COMMISSIONER,
EVERGLADES DISTRICT.

ALL IN COMMUNITY ARE INVITED

Series of Farm-Home Meetings To Be Held May 11-13

Growing out of a suggestion made by Professor H. L. Speer, principal of the Canal Point high school and teacher of agriculture in the Smith-Hughes school, a program was made up in West Palm Beach for a community short course in home economics and agriculture to be given in Canal Point May 11 to 13.

Mr. Speer's idea was to stimulate interest in the planting of ornamentals, but the meeting has been arranged to come out to at least some of the meetings during the three days.

The program follows:
Community Short Course of Home Economics and Agriculture for the Benefit of Canal Point and Pahokee Communities, May 11th to 13th.—S. W. Hiatt in Charge.

Tuesday, May 11.—Canal Point School, 2:30 p. m. Cooking and nutrition program. Practical demonstration, Isabel Thursday, Food Specialist, Florida State College.

8:30 p. m. Canal Point Church, community meeting.
Poultry Program led by N. R. Mehrlhof, Extension Poultryman, Jacksonville, M. U. Mounts, Asst. County Agent, H. L. Speer.

The Farm Flock.
The Back Yard Poultry Flock.
Raising Poultry for Profit.
Marketing.

Wednesday, May 12.
8:30 a. m. Visiting neighborhood poultry flocks.
10:30 a. m. Canal Point School, Poultry program, continued.—N. R. Mehrlhof.

11:30 a. m. Ornamental planting for the home.—H. L. Speer.
11:30 a. m. Highway Beautification.—S. W. Hiatt.

2:30 p. m. Cookery and Nutrition.
"Preparation and use of tomato products." Practical Demonstration.—Isabel Thursday.

9:30 a. m. 13—Canal Point School
Thurs., May 13.—Simple garment making (Club Girls only).—Edith Y. Morgan.
10:30 a. m. Conventions for the home.—Isabel Thursday.

2:30 p. m. Food Contests and Scoring products.—Isabel Thursday.
Everybody invited and urged to attend any or all of the above sessions.
EDITH Y. MORGAN,
County Home Demonstration Agent.
S. W. HIATT,
County Agent.

All in the Looks

Betty is four years old and has a baby sister. Betty's grandmother was playing with her little sister, and the baby pulled grandma's nose, to which grandma unthoughtfully said: "Oh, you little pup?" And much to her surprise Betty answered: "She's not a pup, grandma; she just looks like one."

Old Fight With Indians

No intelligent estimate can be made of the number of Indians engaged in the Turner Falls (Miss.) fight. Five Indian women said that 400 were killed. The Pocumtucks suffered severely and their power was forever broken. One hundred and forty-five white men participated in the fight. Everyone were killed and three were wounded. The attack occurred on May 19, 1676.

UNITY METHODIST EPISCOPAL CHURCH

South Bay.
Sunday school, 10 a. m. L. Cowen, superintendent.
Fragging, 8 p. m. Come here with us in this great work. Let us seek to know the will of God.
WM. JESSE THOMAS, Pastor.

CANAL POINT

James I. Custer, formerly of Pahokee, writes us to change his address from Fort Lauderdale to Kissimmee, Fla.

While J. G. Weeks, the agent for the Standard Oil Company, was in Jacksonville this week he was told the oil distribution plant would not be installed until the railroad had put in the sidetrack. All of the material is here.

Federal prohibition officers visited Canal Point the latter part of last week and took two men to the coast. The men gave bond and returned to Canal Point the next day. A part of a case of whiskey is reported to have been found in an adjacent tomato patch. The officers who visited Canal Point are understood to have made several arrests in Okeechobee county.

J. A. Rostan of Lake Worth, an officer of the First Bank & Trust Company and the First Bond & Mortgage Company of that city, visited Canal Point Wednesday, accompanied by J. W. Hammond, Dr. Robinson and an officer of the bond and mortgage company. Mr. Rostan was an officer of the sugar company and he and Mr. Hammond and Dr. Robinson are stockholders in the Pioneer investment company. They agreed to have several acres of the sugar company and he and Mr. Hammond and Dr. Robinson are stockholders in the Pioneer investment company. They agreed to have several acres of the sugar company and he and Mr. Hammond and Dr. Robinson are stockholders in the Pioneer investment company.

J. G. Weeks returned Monday from business trip to Jacksonville. He left here Friday, going on the train and came back in a Ford sedan he bought from Elliott & Robinson and got delivery on in Jacksonville. He drove back by way of Dixie highway to Stuart and from Stuart by way of Indian town.

While in Jacksonville he called on his sister, who is attending business college. Hastings is shipping potatoes at the rate of 75 cars a day. Mr. Weeks learned as he passed through there.

YOU CAN'T TELL
You cannot always count on the swift one to win.
For there's more to a race than the speed.
The one that stays with it through thick and through thin,
Is the one that comes out in the lead.
You cannot always count on the wealthy to win.
In the race for the greatest of earth,
For their silver and gold will be counted as tin,
When compared with the man of true worth.
You cannot always tell by their place in the paw.
Their standing in heaven above;
For the righteous in numbers are only a few,
When compared with the Savior's true love.
—FRANK FRIEND.

MAKING DIKE EAST FROM LATERAL B

Executing Old Plan To Shut Off Flatwoods Water That Has Overflowed Farm Land

Prevention of overflow of Coomans flatwoods water will be accomplished by a dike the dredge Florida is making, starting at the north end of lateral canal B and to extend southeast to the north end of lateral A and thence to the north end of Big Mound canal. By holding off the flatwoods water and stopping it from coming into West Palm Beach canal in too large volume the overflowing of West Palm Beach canal will be prevented in a measure, and benefit will thus be done land in Pahokee drainage district and Indian Lake district.

Big Mound canal is 12 miles southeast of Canal Point and it extends north five miles to the northeast corner of section 18, township 42, range 39, lateral A is two miles west of Big Mound canal and lateral B is two miles still further west. A dike was made last year by the dredge Florida from the north end of lateral B to the ridge, ending at a point a little more than two miles north of Canal Point. Now the dredge is working east from the end of lateral B instead of west. Spoil is being thrown to the north side, with a small inside ridge of water and local rainfall will be run into West Palm Beach canal through the three canals B, A and Big Mound.

The Florida started at the north end of lateral B, six miles east of Canal Point, about April 14 and has made about half a mile of dike so far. The depth of the inside canal is not important, the main purpose of the work being to make the dike. The height of the dike depends on how much material is available and this depends on the elevation of the land. The spoil is very sticky because of the large amount of water in the flatwoods that seeps southward from Allapattah flats.

Falled of High Office
John Rutledge of Charleston, S. C., who took a prominent part in events during the American Revolution, was appointed chief justice of the United States Supreme court in 1795, but his term of office was so brief that he never took office.

Origin of Coal
The romance of the origin and forming of coal has been expressed by a scientist in the following words: "The rough, dirty lumps are the monuments of a silent forest of strange trees. They contain the stored-up energy of the sun which is shown on these primitive plants."

O. P. Griffin May Decide To Stay In Business

O. P. Griffin, the Canal Point general merchant, may reconsider his original plan to retire from the mercantile business, he said this week, after checking up on sales. The sale that was put on two weeks ago showed the large trade territory of Canal Point and the heavy purchasing power, he said, and these considerations, with the fact that Canal Point seemed just about to start on its biggest growth made it appear advisable from every standpoint that he stay in business.

"I am grateful for the many kind expressions, many customers having said they hoped the store would not close and expressed the hope that Canal Point would not be deprived of a store of this kind, as it might be, because I have not had a satisfactory offer from anyone to take over the rest of the stock and the lot and building," Mr. Griffin explained. He added that the sale was still under way with reduced prices and that his final decision would be made later.

Mr. Griffin came to Canal Point about three years ago from Georgia. He began business on his own account, as a partner with L. L. Davis and later took over Mr. Davis' interest. He had accumulated a very large stock when the freeze and the rains in January and the slump in the real estate business checked business. The sale has reduced his stock to better proportions, he says, and made it possible to deal with new conditions in the future.

GLADES COUNTY

(Moore Haven, County Seat)
The Palmadeo school closed March 23 with a picnic at Fishing creek. Five farm roads were ordered action at the last meeting of the board of county commissioners. This is an action necessary to establishing the roads for improvement from public funds later.

C. H. Holcomb, who used to live in Canal Point, is maintaining a suit to quiet title and remove cloud on property in Glades county. The suit is against The Florida Land and Improvement Company and all others who claim any interest.

Adolph Ulrich, a graduate of an agricultural college in Germany, has arrived at Citrus Center and joined the staff of the Citrus Center Land Company.

County Judge R. C. St. Horne attended the Masonic grand lodge at Cape Petterburg.

Mary, the 7-year-old daughter of Mr. and Mrs. John Hagan of Tampa, was instantly killed when one of the other children in the family accidentally discharged a shotgun at her.

Mr. and Mrs. W. E. Templeton of Okeechobee visited friends at Buckhead.

TORRY ISLAND

Mrs. Bessent says "When it rains it pours." She entertained the following Sunday: W. A. Bessent and Mr. and Mrs. Dave Turner of Fort Lauderdale; Mr. and Mrs. Steve Rasmussen and Rasmussen's mother, of Belle Glade. The Bessent and Smith families made a trip to Canal Point the first of the week.

The following made a business trip to Palm Beach Thursday: Mr. and Mrs. L. D. Bessent and Mr. and Mrs. Gus Cromatic. E. L. Sessions of Canal Point visited the island Thursday evening. He looked at some Irish potatoes and said they were the finest he had seen anywhere.

Mr. Bessent is disposing of some of his help as he is catching up on the potato digging.

Mr. and Mrs. Ralph King and Ralph King, Jr. spent the week end with the Bessents.

Oscar Lassiter gave a big fish fry at Rasmussen Island as the closing of fishing season. A large majority of the island people attended, some from Belle Glade and a large crowd from Ojias. Everybody seemed to have plenty of fish and a good time.

OKEELANTA

OKEELANTA, Fla., May 3.—The ability to swim saved the Ajima boys, Ben and John, from drowning in the North River canal last Wednesday, when their small boat, rigged with a "kicker," turned turtle.

S. R. Cooper returned from Miami Saturday night without he had taken E. Tschudi, a hand-cyclist from Oregon.

E. J. Cooper and Ed Cowell spent some time during the week clearing the canal of accumulated hyacinths between town and South Bay. The latter is now also owner of a launch.

Last Saturday and Sunday brought in quite a number of coast visitors in their cars. A family of five from Delray, owning 10 acres west of the old Okeelanta townsite, camped overnight in the cabin south of the shore.

The tract was bought of Bryan & Greenwood in 1920, but it was not possible to reach it at this time of year on account of the forest of pig weeds and other jungle growth.

Mr. Smith and the young son, who have been up twice before, in company with two other gentlemen from Lake Worth, motored in Sunday forenoon. The two latter—Hoffman and Quisenberry—were in quest of land. They were much taken with what they saw of the cultivated acreage and wild vegetation. We are promised to see them again in the near future.

Messrs. Lee and Reese from South Bay dropped in for a social chat with Stan Cooper also that day.

J. V. Fagan and wife and R. A. Harvey and wife were guests at our local hotel, Saturday and Sunday. The couples used a heavy Dodge car to bring them from Miami on this tour of inspection. On their return in the afternoon.

Politics—Democratic

Policy—To try to be accurate and fair. Contributions stating views opposed to the views of the editor of the paper are desired more than contributions that agree with the editor's views.

ternoon, so it has just been learned, the car, a new Dodge sedan, was badly damaged and put out of commission in crossing the make-shift bridge between Okeelanta and South Bay. This "bridge" (forgive the use of the word bridge) has been an eyesore, a disgrace, a claim on the county, and a menace to motorists. It is not at all likely that any of the county commissioners has ever seen it. It is left to the settlers of the Glades to shift for themselves. The owner of the damaged car has, however, a claim on the county, since this is a laid out road on which public money has been expended and we are ready to prove it. Let the county be made to pay for damages sustained so that it will take its responsibility more seriously in the future. The Ajima boys, so we understand, brought first aid.

Mrs. Marvin and son Gail, pioneers at Okeelanta, coming here in 1926, paid their old friends a brief but pleasant visit in the afternoon of the Sabbath. Early Monday morning, Mr. Clark, wife and child, started on their journey to Arizona on motorcycle with side car attached. Their neighbors and friends surely wish them good luck.

The Littles from their ranch on the Miami canal, which is a lady friend, Mrs. Hammill, spent part of Monday with the Coopers, Corvells and the Mothers-tongues here. Since Rita has again become the post office for the settlers on that canal they are not as frequently called upon in this way.

Dave Hetherington and John Ajima took a business trip to the county seat in Dave's car on May last.

MOORE HAVEN

(Compiled From The Democrat.)
Judge Alton B. Parker, who was the Democratic nominee for president about 20 years ago, visited Moore Haven last week, accompanied by his wife. He owns land there and goes there every year. Judge and Mrs. Parker were guests at the Luncheon Club meeting last week.

The eighth grade graduation exercises were held April 23. E. H. Thurston, the prize for catching the most big fish in the shortest time. His catches included a 7-pound bass and a 9-pounder.

A "gold seal" certificate was awarded the Moore Haven Hotel of which V. W. Butler is manager. The hotel inspection office. Two small eating houses in Moore Haven, were closed temporarily until they cleaned up.

Mrs. V. Gram has returned to Tampa, where she and Mr. Gram now live.

Judge C. P. Hadden has been ill.

Mayor G. L. L. Smith has made considerable improvement to the grounds of his dwelling house.

Rev. Anderson, a Presbyterian supply minister, visited Moore Haven recently.

EDITOR CRUISES SOUTH SHORE FOR VOTES AND NEWS

Continued from first page

trees that were just being set. Again I beg pardon for the digression. By the way, that Palm Beach & Western railroad was never built but the effort for it sort of laid the foundation for the Seaboard getting into West Palm Beach. Some day we will have a railroad between the eastern or southern shore of the lake and the county seat.

Tuesday morning I walked from Sebring Farms to Bolles Hotel—I should say Lake Harbor, but all the old-timers remember "Miami Lock" as Bolles Hotel. I was pleasantly received there and got acquainted with the new-comers as well as meeting the friends of long years standing. I came pretty near seeing the Littles from down Miami canal; they visit at the home of Mr. and Mrs. J. E. Chestnut sometimes, and had been there a short time before and were due again shortly.

I had a schedule to travel on but at Miami Lock I met the accommodating young man who runs the boat for the engineering department of Palm Beach drainage and highway district and he took me to South Bay. Although my idea had been to go to Chosen and Belle Glade, I did dinner at Mrs. Brooks' South Bay hotel and then called on the South Bay business men, being favored with some subscriptions and orders for job work and making some collections.

If I chance to be nominated and elected county commissioner I can afford to make trips like this more often, keeping in touch with the people and finding out their views and learning what they want and how they want it done. I am looking after newspaper business. The salary as county commissioner will come in very handy.

At South Bay I met Frank Friend. He had driven over from Pahokee on his Ford truck, using the grade of the Belle Glade drainage road in place of Mr. Friend told me he had received a letter from Mr. Everett at South Bay who had inquired if this was the Frank Friend he had known in Boulder, Colorado. Mr. Everett had seen "Mr. Friend" in the Everglades.

It turned out that the men had known one another in Colorado and they had a pleasant visit.

Meeting Mr. Friend I changed my schedule again and decided to ride back to East Beach with him because it would give me my first chance to see the new road grade. My plan had been to go to Belle Glade that night and stay over there until the three or four miles away from my work was all I could spare, I feared.

On this trip I did not say anything long or she was to vote in the primary, contemplating myself with saying I would be grateful for support. I figured that how a man or woman is to vote is his own business, and it pleases me because if he says he will vote for me but I wouldn't want anybody to be bound by a promise that he could not keep willingly.

Works' Lubricant

Elbow grease builds better jobs than will any lubricant.

Don't waste time. Try Works' Lubricant.

You have heard it—"they are all good automobiles"

THE impression that all cars sold at approximately the same price give approximately the same results, never was less true than today.

There are now two types of building motor cars. One is to forget quality and build cars for trading purposes. The cost of production is cut to the bone, so that dealers may offer you more than the market value for your used car.

The Buick way is to build for quality's sake—to give owners a better new car full of value—with every modern feature. Compare Buick design to that of other cars of the same or higher list price, and see Buick superiority firmly in your mind, before you spend your money.

BELLE GLADE

BELLE GLADE, May 4.—A number of excellent slogans were presented to the Chamber of Commerce. Mrs. H. T. Holloway was first place with "Her Soil is Her Fortune." Where the Two Roads Cross" received the second largest number of votes, and "Where the Farmer Spends the Winter" third.

B. H. Duxton of Miami is here, having the rest of his farm cleared and put under cultivation.

J. R. Watts of St. Petersburg spent the week end here looking after the marketing of crops on his place. He owns farm land and subdivides property here.

Bean picking and potato digging are in full swing. A great deal of truck is being sent to the coast, as many as seven truck loads a day going out.

Work on the Palm Beach road is progressing well. The roller is working within the last half mile of Belle Glade.

Negotiations are under way for Bryan & Holloway to do the grading for the F. E. C. railroad extension from Canal Point so we feel rather certain of the road within the next few months.

One of the Bryan & Holloway dredges is working on the east dike of the north unit of the Palm Beach drainage and road district.

Charles Hemminger and son spent a week at their home at Dade City recently.

WM. JESSE THOMAS, Pastor.
In court of the County Judge, Palm Beach County, Florida.
Estate of Frederick Osborn.

By the judge of said court Whereas, J. H. Tidwell has applied to this court for Letters of Administration, in the estate of Frederick Osborn, deceased, late of said county of Palm Beach.

These are, therefore, to cite and admonish all and singular the kindred and creditors of said deceased to be and appear before this court on or before the 30th day of April A. D. 1925, and file objections, if any they have, to the granting of Letters of Administration on said estate, otherwise the same will be granted to said J. H. Tidwell or to some other fit person or persons.

Witness my name as county judge of the county aforesaid this 29th day of March A. D. 1925.
Richard P. Robbins, County Judge.

Literary Heroines
One of the most engaging characters in Dickens' novels is Dolly Varden, and in the seventies of last century she gave her name to a style of dress. There were Dolly Varden bonnets and Dolly Varden frocks, just as later there were Trilby hats and Trilby hats, although neither of these famous heroines ever had any existence except in the pages of literature.

FARM TALK

G. L. Meyers is a trucker who lives a mile or so out of the Moore Haven town limits. I visited his place about two and a half years ago and noticed how he handled his ground and his work. One of the things I noticed was an ingenious arrangement for keeping birds out of his truck garden. He had set out and stretched wires from post to post over a patch of peas and tied bells to the wires. There were all kinds of bells and it looked funny until I saw how it worked. A bird would fly the garden stuff and plan to feed on it and would be under the light on the wire. The setting of the bird on the wire would ring a bell under him; the bird would leave instantly, flying off and returning to light on another wire. Again the bell would ring and the bird would be scared off.

Some persons say this plan won't work—that the birds will get used to the sound of the bells, but Mr. Meyers said it did work and he ought to know. At Palm Beach three weeks ago I met Mr. Benbow of Moore Haven and he told me he was going to give Mr. Meyers the use of as much land in the Benbow farm as Mr. Meyers would use. The Meyers tract to be located on a main road, all the travelers can see what can be done as to summer farming.

All of the above is brought to mind when I notice in the Glades County Democrat of last week an article headed "1400 in four months from 3 acres." Below is reprinted part of the Democrat's account.

G. L. Meyers is shipping ten to a dozen hampers of white summer squash during the past three years. Maiton county has flouted reports of economic depression by voting a \$600,000 road issue within the past six months while Orange county, during the month of April voted \$700,000 for county-wide road improvement on top of a previous issue of \$250,000.

Mr. Dutch's report showed that an income tax of \$165,000 will occur on the first \$200,000, not to be paid until the second issue of like amount is issued in 1927. The first issue will mature in 1928, July 1, with a principal payment of \$50,000. The final payment would be due on July 1, 1940, an amount of \$300,000.

"Good roads for which this issue is proposed to be used are the greatest of all requirements for any community as its growth or progress can only be measured and aided by adequate transportation facilities, and in an opinion should be classed as necessities and never placed on the luxuries or at other times prohibited list," his statement reads.

"In my opinion, with due regard to all worthy projects it behooves Palm Beach county to enter upon an intensive road building program making the most excellent first and paramount to all other endeavors," he urged.

The appropriations for each item of highway improvement were not released yesterday by the commissioners, further time to map out the distribution of the proposed issue being restriction of that all phases of the program might be financed judiciously, it was stated.

Mr. Meyers practices making all of his land work all the time, and in consequence has money in the bank for anything he needs at any time.

His most recent investment has been in improvements to his home. There has been a complete re-doing of the front part of the house which makes it pretty neat and comfortable inside as may be. Then the kitchen had been built, a new roof, bathroom and toilet and running water added, the cost of these improvements going above \$1,000 and all being paid from this winter's profits on the vegetable crop.

Who's Educated?

Ramsay MacDonald, former British premier, says that the most educated man he knows is one who can't sign his own name. He defines an educated man as one who "restrains subtle snide and qualities which make him calm in adversity, happy when alone, just in his dealings and rational in all the affairs of his life."

PLAN ELECTION ON HUGE BOND ISSUE FOR COUNTY ROADS

Continued from first page

the next three years," said Chairman Joseph E. Bell, of the commission.

The board has been considering the highway program for two months. Large delegations have appeared before us, and opinion has been fully expressed. Sentiment throughout the county has crystallized in favor of the trail and attendant improvements. The people have virtually demanded it," the chairman concluded.

"We're selling Palm Beach county to ourselves. The issue will be an indication that we do not need to bleed our winter visitors to effect our subsistence," Frank E. Wideman, the board's attorney said.

It was pointed out that other Florida counties are pushing ahead with even larger issues than the one confronted here.

It was shown that Pinellas county has spent \$839,000 in highway bonds during the past three years. Marion county has flouted reports of economic depression by voting a \$600,000 road issue within the past six months while Orange county, during the month of April voted \$700,000 for county-wide road improvement on top of a previous issue of \$250,000.

Mr. Dutch's report showed that an income tax of \$165,000 will occur on the first \$200,000, not to be paid until the second issue of like amount is issued in 1927. The first issue will mature in 1928, July 1, with a principal payment of \$50,000. The final payment would be due on July 1, 1940, an amount of \$300,000.

"Good roads for which this issue is proposed to be used are the greatest of all requirements for any community as its growth or progress can only be measured and aided by adequate transportation facilities, and in an opinion should be classed as necessities and never placed on the luxuries or at other times prohibited list," his statement reads.

"In my opinion, with due regard to all worthy projects it behooves Palm Beach county to enter upon an intensive road building program making the most excellent first and paramount to all other endeavors," he urged.

The appropriations for each item of highway improvement were not released yesterday by the commissioners, further time to map out the distribution of the proposed issue being restriction of that all phases of the program might be financed judiciously, it was stated.

Mr. Meyers practices making all of his land work all the time, and in consequence has money in the bank for anything he needs at any time.

His most recent investment has been in improvements to his home. There has been a complete re-doing of the front part of the house which makes it pretty neat and comfortable inside as may be. Then the kitchen had been built, a new roof, bathroom and toilet and running water added, the cost of these improvements going above \$1,000 and all being paid from this winter's profits on the vegetable crop.

The Happy Home

By Margaret Brown

WHY SERVE?

Utensils With Handles

"You can't imagine how much easier my cooking has become since I have discarded the old-fashioned practice of using handles that haven't handles," a housewife told me recently. "I used to prepare nearly every thing in a bowl. First because my mother had done so, and because I had always seen bowls used. Then one morning, in lifting a heavy bowl of pancake batter back and forth from the table to the griddle, I wondered why it seemed so awkward and why I was so tired, and it occurred to me that I had a bowl twice as large and heavy as I needed, and that, moreover, my hand and arm were tired grasping the rim of the earth-ware utensil.

"The next time I made griddle cakes, I mixed the batter in a light aluminum saucerpan with a handle. This would be lifted easily across to the griddle, and the batter poured out via the lip instead of with a spoon. Later on I substituted the pancake arties in restaurant windows, and put the batter in a lightweight pitcher after mixing. It poured out even better from a pitcher than from a saucerpan.

"But I had learned the lesson of the handle. Now I ask all sorts of puddings, cakes, muffins and sauces in dishes with handles. Anything that has to be poured into a baking pan or pudding dish can be managed much more conveniently in this way. Bowls are the most unwieldy, awkward dishes in the world to scrape contents from.

"I use utensils with handles for other purposes, too. I keep a small aluminum cup for melting butter. I have a quart cup in which I keep my own drippings and similar fats for cooking. The handle never gets greasy, and it is so very handy to manipulate. Drippings can be poured from these cups without the use of a spoon, if I warm a moment over the fire.

"I never bake cake any more in the handleless pan. Those with the moreish handle, that releases the cake from the pan, are so much more comfortable to take from the oven. In fact, I think that every utensil in the kitchen should be provided with a handle, if possible."

Florida Muck Farms

"America's Ever-Producing Soil"

LAKE HARBOR Will Be the Shipping Point for this Great Region--the Supply Base--the Recreational, Educational and Business Center

Florida Muck Farms

This superlatively rich region has been made accessible by the construction of hard roads, and it is being made possible for the farmer to operate on it profitably the whole year by the installation of controlling works. The system includes dikes, and levees, great pumps driven by powerful engines, and provides for irrigation as well as drainage.

Eleven 54-inch syphon pumps, reversible in operation, each having a capacity of 56,000 gallons a minute, will have been installed in four units by the end of the current year, rendering many thousand acres subject to cultivation. These works are the most efficient known to engineering science. The lands which they will reclaim are regarded as the richest in America. Millions have been spent to render their fertility subject to the farmer, and in the opinion of those best qualified to render an opinion, they are worth every cent which has been expended, or to be expended, under existing contracts. The potential value of these lands is incalculable.

It is impossible to describe the productivity of this soil without seeming to exaggerate. The one certain way to be convinced is to view the land, and talk, man to man, with those who are farming it.

Parties being formed to view the property.

Write or wire for reservations.

| COUPON | | E. N. |
| Florida Muck Farms, Inc., 204 N. E. Second Avenue, Miami, Florida. | | |
| Gentlemen: Will you please send me, without obligation, your illustrated booklet describing FLORIDA MUCK FARMS and LAKE HARBOR Townsite. | | |
| Name <input type="text"/> | | |
| Address <input type="text"/> | | |
| City <input type="text"/> | State <input type="text"/> | |

Lake Harbor

LAKE HARBOR is the townsite which is being developed as an outstanding feature of FLORIDA MUCK FARMS. It is situated at the head of navigation, where the Miami canal taps the great Lake Okechobee, and gives an open waterway to the port of Miami. It is on the cross-state highway, midway between West Palm Beach and Fort Myers. This is a hard road, eighty per cent complete. It is the shortest trans-peninsula route in Florida, and because of this fact and its many scenic attractions it will become the most popular cross-state road. LAKE HARBOR will be an attractive stop-over point between the Atlantic and Gulf terminals.

Its advantageous location with relation to other towns in the region, and at the very head and center of the farm development, will cause LAKE HARBOR to become a populous and busy place. Not only will it be the shipping point and supply base for this fertile region but it will be the residential, recreational and educational center.

LAKE HARBOR was laid out by a town planner of recognized ability, and includes all the features of a modern city. The men who are developing this property are looking forward to the time when it will be populated by many farmers, whose families will have the advantages of a modern city near at hand and accessible by good roads to relieve the farm of that dreaded isolation which has been a curse to so many rural communities. Theatres and other centers will afford farmer and town dweller wholesome diversions, while churches, schools and libraries will place their advantages at his door.

Fill in the coupon and mail—you will receive an illustrated descriptive booklet free.
